## **Tech Source awarded contract by Indra to supply ATC displays for Poland**

***INDRA SISTEMAS** Madrid has selected **Tech Source Raptor 2100 FPS 2K x 2K** fully digital display subsystems for Poland's new Unified Air Traffic Management System, named *Pegasus 21**

**Indra** has ordered **100 units of Raptor 2100 FPS** LCD displays for a contract which **Indra** was awarded by PPL, Poland's National Agency of Air Navigation Services. This project involves an upgrade of the country's entire control center network and includes the modernization of the control centers main network in Poland (Warsaw, Katowice and Gdansk), along with their subordinate control towers: Warsaw, Katowice, Gdansk, Rzeszow, Wroclaw, Szczecin and Krakow.

This order follows a previous contract where **Indra** deployed a large number of **Raptor 2100 FPS** displays in Panama. These orders were placed through ACAL ATC Division, a division of ACAL IT in the UK. The ACAL ATC Division is the master distributor for Tech Source in the EMEA territory.

**Darrel G. McCollough, President of Tech Source** said: *"Indra is a world leader in supply and integration of ATC systems and we have been supplying our ATC graphics technology to Indra now for several years. We are very proud that Indra has chosen Tech Source display technology for this prestigious project."*

**Federico Rueda Laorga, Director of the International ATM Division within INDRA SISTEMAS** said: *"Tech Source is a key supplier of our state-of-the-art ATC systems. For us the main advantages of the Tech Source solutions are proven quality, flexibility and short time for delivery."*
