Tech Source awarded contract by Raytheon

Raytheon Company awards Tech Source a contract valued at nearly \$1.4 million for supply of Raptor series graphics adapters

ALTAMONTE SPRINGS, FL -- (November 1st 2005) -- **Tech Source** had been selected by **Raytheon Company** as the supplier of the high resolution graphics adapters for the FAA Standard Terminal Automation Replacement System (STARS) several years ago. This new contract for Tech Source graphics technology will facilitate the continued roll out of the STARS Air Traffic Control upgrade program throughout the United States.

Richard Constantin, Raytheon Company's subcontracts manager for the STARS project said: *"Tech Source continues to prove their responsiveness as a long term supplier to the FAA STARS program. We maintain our confidence in their expertise as a graphics controller supplier."*

Selwyn L. Henriques, President of Tech Source stated: *"We were very proud to have been selected as the supplier of graphics technology for the STARS program. We remain committed as a supplier to Raytheon and the FAA. We continue to bring new technologies to this market and strive to be the best graphics card supplier for ATC programs worldwide."*

ABOUT TECH SOURCE

Privately owned, Tech Source, Inc. is a leading manufacturer of high-resolution graphics accelerators for OEMs of PCI computer systems. Tech Source is widely known for its Raptor PCI family of graphics accelerators. For more than 18 years, Tech Source has provided advanced solutions for OEMs, integrators, government contracts, VARs and large corporate users. Tech Source is a leading supplier of graphics accelerators for applications requiring ultra-high resolution, such as air-traffic control, medical, seismic and satellite imaging.
