- Displays video from VCR, DVD or camcorder
- Raptor GFX TV application with rich features
- 24-bit support
- X Windows and CDE compliant
- Graphics card compatibility with:
  - Raptor GFX 200 Series
  - Raptor GFX 450
  - Raptor GFX 32C

The Raptor GFX TV product from Tech Source, Inc. is a perfect solution for financial and command & control markets where TV/video feed is an important ingredient in data analysis. The Raptor GFX TV card is a single slot PCI card that provides “Video in a Window” on your Sun Microsystems™ desktops and servers. The Raptor GFX TV application provides an intuitive graphical user interface (GUI) that seamlessly integrates into the X Window environment. The Raptor GFX TV window can be resized as

per user preference. The “Always on Top” feature is very convenient when continuous access to TV feed is important.

Raptor GFX TV processes the video using the on board video processor without host CPU overhead. That way, the performance of your other applications will not be impacted. It offers all of these features at a great value!
